

1

**Explain Everything** is an easy to use interactive whiteboard and screen-casting app.

2

With **Explain Everything**, teachers or students can use the app to visually represent information, materials, and/or instructions.

3

**Explain Everything** allows you to draw, type, and import images, videos, pdfs and PowerPoint presentations to be edited, narrated over, drawn on, etc.

4

The whole process can be recorded with or without narration through screen-casting.

5

The app can be used by teachers as supplementary instruction, instructional review, media at a specific stations during collaborative group work, and much more.

6

The app can be used by students to demonstrate understanding of a concept or task, to record work with narration for later studying, and much more.

7

**Explain Everything** allows you and your students to create dynamic multimedia content to support teaching and learning.

# What you need to know about “Explain Everything”

Presented by Brittney  
Merrweather. Bachelor of

## Explain Everything by Morris Cooke

- No account necessary, but the app costs \$3.00
- Images and videos are easily exported directly to Camera Roll, email, Dropbox, Google Drive, YouTube, and more
- Images and videos are easily imported from all the same areas.
- Users can make multiple slides for a dynamic presentation
- Editing is made easy with timeline: though be careful to lock your timeline to avoid recording over information
- The app is iOS, Android and Windows compatible
