

FRENCH RESOURCES FOR LANGUAGE LEARNING & PRACTICE

Statistics show that learners of a foreign language tend to grasp and acquire the language quicker when they immerse themselves in the language they aim to learn. This page will provide you and your child various resources that will bring further exposure to French language learning. In addition to classroom time, these additional supports will help your child in practicing their oral, reading and written French skills - the more exposure and opportunities your child can have with these resources, the more likely they will gain a deeper acquisition and comprehension of French.
