Windows/Mac Setup

Step 1: Remove Webcam and USB Cable from Kit
- Connect Cable into the back of the webcam and USB-A end to Personal Device (PC, Laptop, iPad, etc.)
  - If successful, the LED light on the front of the webcam will light up.

Step 2: Put Webcam on Monitor & Attach Privacy Screen if you want

Step 3: Test Camera
- For Windows you can type into the lower left hand search bar **Camera** and the webcam should automatically be turned on.
  - Or for older operating systems, find **Camera** through the **Windows Start** in the lower left hand corner of the screen.
- For Mac's you can open **LaunchPad** and test using **FaceTime**, **Photo Booth**, **Markup**, or **head pointer**.
