Windows Setup/User Video:

https://www.youtube.com/watch?v=dkLOdHVCb7U&ab_channel=ZdenkaDarula

Windows/Mac Setup

Step 1: Plug-In

- Use the provided USB cord to connect OBSBOT to digital device
 - Plug into **USB or USB-C port** on device and USB-C into OBSBOT

- Use provided USB-C to USB adaptor if needed

- Light on the **front** of OBSBOT should be **solid green**

Step 2: Setup (tripod or magnetic monitor/desktop attachment)

- If using tripod, screw into bottom of OBSBOT

- Place on flat surface
- If using monitor/desktop attachment attach magnetic end to bottom of OBSBOT

- Place where desired on either a monitor or desktop surface

Step 3: Test

- For **Windows** open **Camera** application by using the bottom left **search bar** on your windows machine OR
 - Find it through the **Start menu** in the bottom left of your screen
- For **Mac** open **LaunchPad** and test using **FaceTime, Photo Booth, Markup, or head pointer.**

Step 4: Start AI Tracking

- To start tracking, **wave right hand** next to face (when doing this do not obscure or cover your face in the process)
 - OBSBOT should **blink blue** then go back to **solid green** indicating it is now tracking
- To stop tracking, **wave left hand** next to face
