# Windows Setup (MAC OSX Setup below)

**Step 1:** Remove Samson USB receiver, mini-XLR connector, lavalier, and transmitter

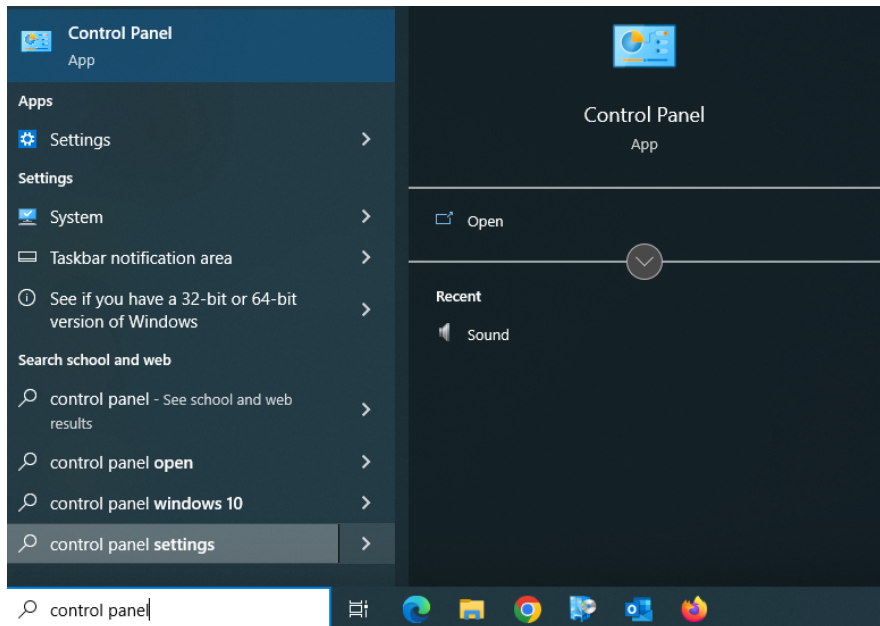

- Plug the USB receiver into a USB port on computer
  - Windows will automatically install the USB driver for that port.

**Step 2:** Set XPD2 as default input/recording device

● Open the **Control Panel** (you can type it into the left hand lower search bar or find through windows start button at bottom left of screen)

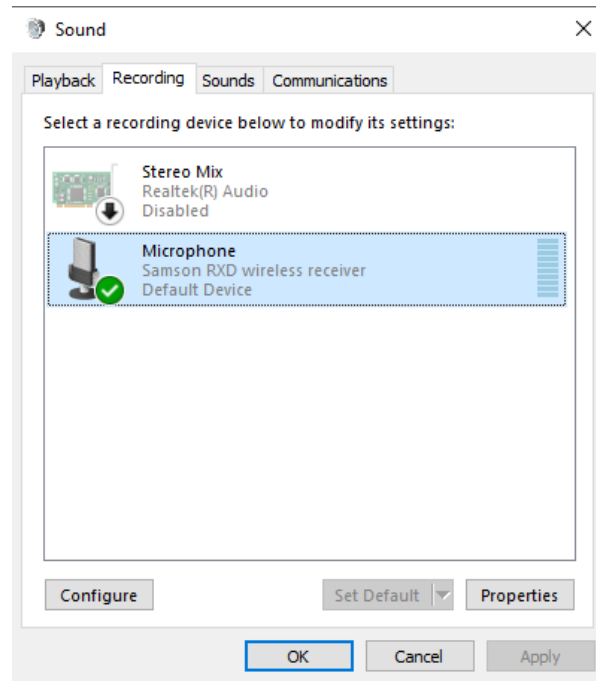

○ **Hardware & Sound Settings** → then click **Sound**.

- Under the recording tab, select "**Samson RXD Wireless Receiver**" and press **Set Default** button

**Step 3:** Power & Pair
- Power on transmitter and receiver by holding the **Power/Pair** switch
  - LED will turn amber

- First time pairing
  - Both receiver and transmitter should be powered on prior to this step

- Hold **Pair** button on RXD2 receiver for >5 seconds until it begins flashing
- Hold **Power** button on transmitter until both LED lights are solid amber

**Step 4:** Connect provided lapel mic, Test, and Adjust Gain
- Connect **lapel mic** to transmitter

- ○ Speak or sing into mic at a normal level and raise input as needed

- ■ Adjust **Gain** knob **inside** transmitter with provided screwdriver if you hear:
    - ● **Distortion** - turn gain control counterclockwise until it disappears
    - ● **Noisy signal** - turn gain control clockwise until it reaches an acceptable level

# MAC OSX Setup

**Step 1:** Remove Samson USB receiver, mini-XLR connector, lavalier, and transmitter
- ● Plug the USB receiver into a USB port on computer (might need adaptor if no USB port)
    - ○ Windows will automatically install the USB driver for that port.

**Step 2:** Set XPD2 as default input/recording device
- ● Open the **System Preferences** from the **dock** or **main Apple menu**
    - ○ Then open **Sound Preferences** → choose **Input tab** → select **"Samson RXD Wireless Receiver"**

**Step 3:** Power & Pair
- ● Power on transmitter and receiver by holding the **Power** switch
    - ○ LED will turn amber
- ● First time pairing
    - ○ Both receiver and transmitter should be powered on prior to this step
        - ■ Hold **Power** button on RXD2 receiver for >5 seconds until it begins flashing
        - ■ Hold **Power** button on transmitter until both LED lights are solid amber

**Step 4:** Connect provided lapel mic, Test, and Adjust Gain
- ● Connect **lapel mic** to transmitter
    - ○ Speak or sing into mic at a normal level and raise input as needed
        - ■ Adjust **Gain** knob **inside** transmitter with provided screwdriver if you hear:
            - ● **Distortion** - turn gain control counterclockwise until it disappears

- **Noisy signal** - turn gain control clockwise until it reaches an acceptable level
