How to Setup and Use the Shidu SD-M800

Step 1: Charge the Speaker (if not already charged)

- Use provided charger to ensure the speaker is charged before use
 - Plug into **wall outlet** or **USB port** and micro usb into side of speaker that says **DC 5V**

- Speaker will voice prompt with “**Low battery, please charge**” if it is low on battery

Step 2: Power On

- Hold **Power switch / play pause** for 3 seconds to turn on/off

- Will prompt by playing a jingle

Step 3: Connect to Desired Input or Output device / Bluetooth Pair

**Short press “M” key to swap between Bluetooth, USB Flash Drive, Micro SD, AUX, and Wired headset.*

- **Wired** headset is provided that can be used to amplify voice
 - plug into side that has a **microphone** symbol on it

- Ensure headset is not pointed towards speaker or it will give feedback

- **Bluetooth** can be used by pressing and holding **M** key on top of Shidu for 5 seconds
 - voice will prompt “**Bluetooth is waiting for connection**” and you should be able to find its bluetooth signal represented as “**SD-M800**”
 - Bluetooth will lose connection if you are more than 10m away from it

- **AUX** cord is provided for connection to secondary devices like a guitar, phone, etc.
 - plug into side that says **AUX**
- **USB Flash Drive** compatible, not provided
 - Plug into side that says **USB**
- **Micro SD** compatibility so that you can play pre-recorded audio
 - Put into same side as **AUX** and **USB**, labeled **Micro SD**
