Windows Setup (Mac 10.6.4 or higher setup after)

Step 1: Remove Microphone and USB Cable from Kit

- Connect Cable to Underside of Microphone and USB-A end to Personal Device (PC, Laptop, iPad, etc.)

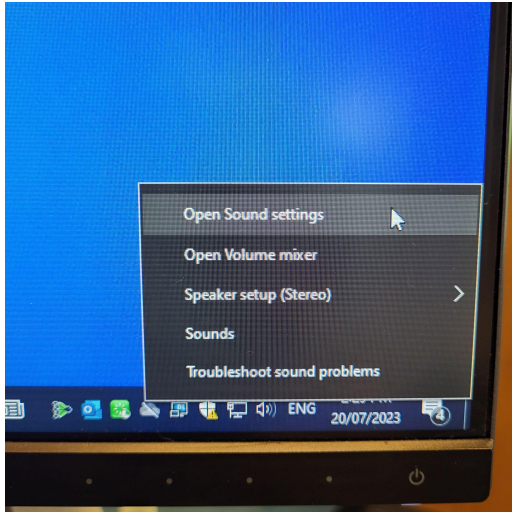

Step 2: Ensure Input and Output Systems are Correctly Designated

- Move to bottom right corner or wherever your Speaker icon is on your computer

- Right click **Speaker Icon** and left click **Open Sound Settings**

- On page ensure **Output** is set to Monitor Display Audio, Speakers, or Headphones you have connected
 - **NOT** Speakers (Yeti Stereo Microphone)

Sound

Advanced sound options

App volume and device preferences

Customize app volumes and the speakers or devices they use.

- **Input** should be set as **Microphone (Yeti Stereo Microphone)**
 - You can test the microphone by speaking into it and seeing if the line labeled as **Test your microphone** moves with the sound of your voice
 - If the line does not move, check the **Mute** button on the mic to see if it is lit up solid.
 - If it is blinking, it means the mic is muted so just press the red light once to unmute and test again.

Mac (10.6.4 or higher) Setup Up

Step 1: Plug microphone into your computer's USB port using the provided USB cable.

Step 2: From the main Apple Menu, select the **System Preferences**.

Step 3: Select the **Sound** icon.

Step 4: Now select the **Input** tab and select “Yeti Stereo Microphone”

Step 5: Select the **output** tab and select “Yeti Stereo Microphone”
